

## Michael Æ and Company

February 8, 2024

Dear Fellow Hosts,

I trust this letter finds you well. As we near the conclusion of 2023, I'm excited to share some updates and reflections from MA8, particularly our Framework.

At Michael Æ and Company, we are deeply committed to pioneering the next frontier of digital innovation through AGI. Over the past few years, our dedicated team has been tirelessly working on developing and implementing an AGI framework which redefine the way we operate and interact in the world.

Our Framework represents a contribution to theory of artificial general intelligence, offering capabilities that go beyond narrow AI systems to mimic human-like reasoning and problem-solving across a wide range of tasks and domains. Through our AGI framework, we aim to empower hosts with unprecedented levels of intelligence and adaptability, enabling them to thrive in an increasingly complex and dynamic world.

From enhancing experiences to optimizing tasks and movements, our framework offer limitless possibilities. By envisioning the power of AGI, hosts can unlock new insights, data, automate, repetitive tasks, and make more informed decisions in real-time, ultimately driving greater efficiency, pace, and awareness.

As we look ahead to the remainder of the year, we are incredibly excited about the opportunities that our framework presents for our company. Whether you're looking to revolutionize your entrepreneurial processes, personal interactions, or stay ahead, our AGI framework is modeled to help you achieve your goals and stay at the forefront of innovation.

Thank you for your continued trust and partnership. Together, we will continue to push the boundaries of what's possible with AGI and unlock a future of limitless potential.

Sevananda,

Michael A.
