

- ад in Russian is "Hell".
- 那 in Chinese means "That".
- Dracula, Batman, Hi, and Golfing are already in English.
- The Sinhalese and Khmer phrases seem to be random characters and I couldn't find direct translations for them.
- The term "Arduino" that you've included at the end of your text is indeed a reference to a popular platform used for building digital devices and interactive objects that can sense and control objects in the physical world. Arduino boards are able to read inputs - light on a sensor, a finger on a button, or a Twitter message - and turn it into an output - activating a motor, turning on an LED, publishing something online.
